PROFESSIONAL SUMMARY

Final-year Computer Science student and AI-driven Full Stack Developer experienced in building production-style web applications that integrate artificial intelligence, RESTful APIs, and modern frontend frameworks. Proficient in React.js, Node.js, Express.js, Python (Flask/FastAPI), and MongoDB, with hands-on experience integrating Groq Cloud AI, Retrieval-Augmented Generation (RAG) pipelines, and OCR-based document processing. Independently designed, built, and deployed multiple multi-service SaaS platforms spanning frontend, backend, and persistent data layers.

EDUCATION

Mysore College of Engineering and Management <i>Bachelor of Engineering in Computer Science (CGPA: 8.36 / 83.6%)</i>	2023 – Present Mysuru, KA
JSS PU College, Ooty Road <i>Pre-University Course (85%)</i>	Graduated Mysuru, KA
[School Name Placeholder] <i>[Degree / 10th Standard Placeholder] ([Percentage]%)</i>	[Graduation Year] [City, State Placeholder]

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3
Specializations: AI & Machine Learning, GenAI Tools (Groq, RAG, NLP, OCR), Full-Stack App Development
Frameworks/Tools: React.js, Node.js, Express.js, Flask, FastAPI, MongoDB, Firebase, SQLAlchemy, Git/GitHub

PROJECTS

- AI Career Pro: Unified Interview & Mentor System** — *Skills: React, Node.js, Python, MongoDB, Groq AI* [GitHub]
– Built a multi-service AI career platform combining a voice-interactive multilingual mentor, a Groq-powered resume auditor with ATS scoring, a dynamic mock interview simulator, and a code execution engine.
– Architected independent services (React frontend, Node.js doc service, Python AI service) over REST APIs.
- EmailAI: Advanced AI Writing Suite** — *Skills: React.js, Node.js, Flask, MongoDB, Groq AI* [Live] — [GitHub]
– Developed an AI-powered email platform supporting structured email generation, multilingual translation, quick rewrite actions, and secure JWT-based user authentication.
– Implemented AI quality analysis, analytics dashboard, draft management, PDF/Word/TXT export, and RESTful APIs using a scalable microservices architecture.
- AI LinkedIn Profile Reviewer** — *Skills: React, Node.js, Python, GenAI, ATS Parsing* [Live] — [GitHub]
– Built a full-stack platform evaluating LinkedIn profiles and resumes to deliver SEO-graded search rankings, professional optimization reviews, and in-depth skills gap analyses.
– Implemented document parsing to generate interactive dashboards featuring customized career roadmaps and copy-and-paste headline improvements.
- AI Study Assistant - RAG-Powered Study Suite** — *Skills: React, FastAPI, Python, MongoDB, RAG* [GitHub]
– Developed a full-stack study platform converting PDFs into summaries, predicted questions, and adaptive quizzes.
– Built a semantic RAG chatbot for document-grounded Q&A and a self-healing database layer falling back to local storage when MongoDB is offline, ensuring cloud independence.
- Eye Checkup Management System** — *Skills: Python, Flask, SQLite, Bootstrap* [GitHub]
– Built a clinic management web app handling patients, doctors, appointments, prescriptions, billing, and reporting.
– Designed a relational schema with 7 interconnected models and modular Flask blueprints for clean logic separation.
- Online Medicine Reminder Web App** — *Skills: Python, Flask, SQLite, APScheduler* [GitHub]
– Engineered a healthcare reminder app automating medicine intake alerts via scheduled email notifications using APScheduler for minute-level background sweeps.

ACHIEVEMENTS

- Participated in **HACKABHIGNA** - AI-Powered Autonomous SEO & Marketing Optimization, a 24-hour National-Level Hackathon organized by the Dept. of CS&E, Adichunchanagiri Institute of Technology (Oct 29-30, 2025).
- Maintains an active public GitHub portfolio with multiple deployed AI and full-stack applications.
